RE: San Jacinto River Waste Pits Superfund Site, Pasadena, Harris County, Texas  
Unilateral Administrative Order, CERCLA Docket No. 06-03-10  
Residential Soil Sampling

Dear Mr. Keith:

Thank you for your May 31, 2011, letter regarding sampling of residential areas near the San Jacinto waste pits. These samples will provide information on whether contamination from the waste pits has impacted the surrounding residential properties. Further, they will provide data for an update of the Conceptual Site Model (CSM) and Remedial Investigation/Feasibility Study Area should that prove necessary. The Environmental Protection Agency looks forward to receipt of the RI/FS Work Plan addendum by June 13, 2011.

Sincerely,

Gary Miller, P.E.  
Remedial Project Manager
